

# NATIVITY

NATIVITY is a unique and pioneering new artwork by Martha Fiennes presented by IZM Productions (<http://izmproductions.com/>) and produced in partnership with Peter Muggleston.

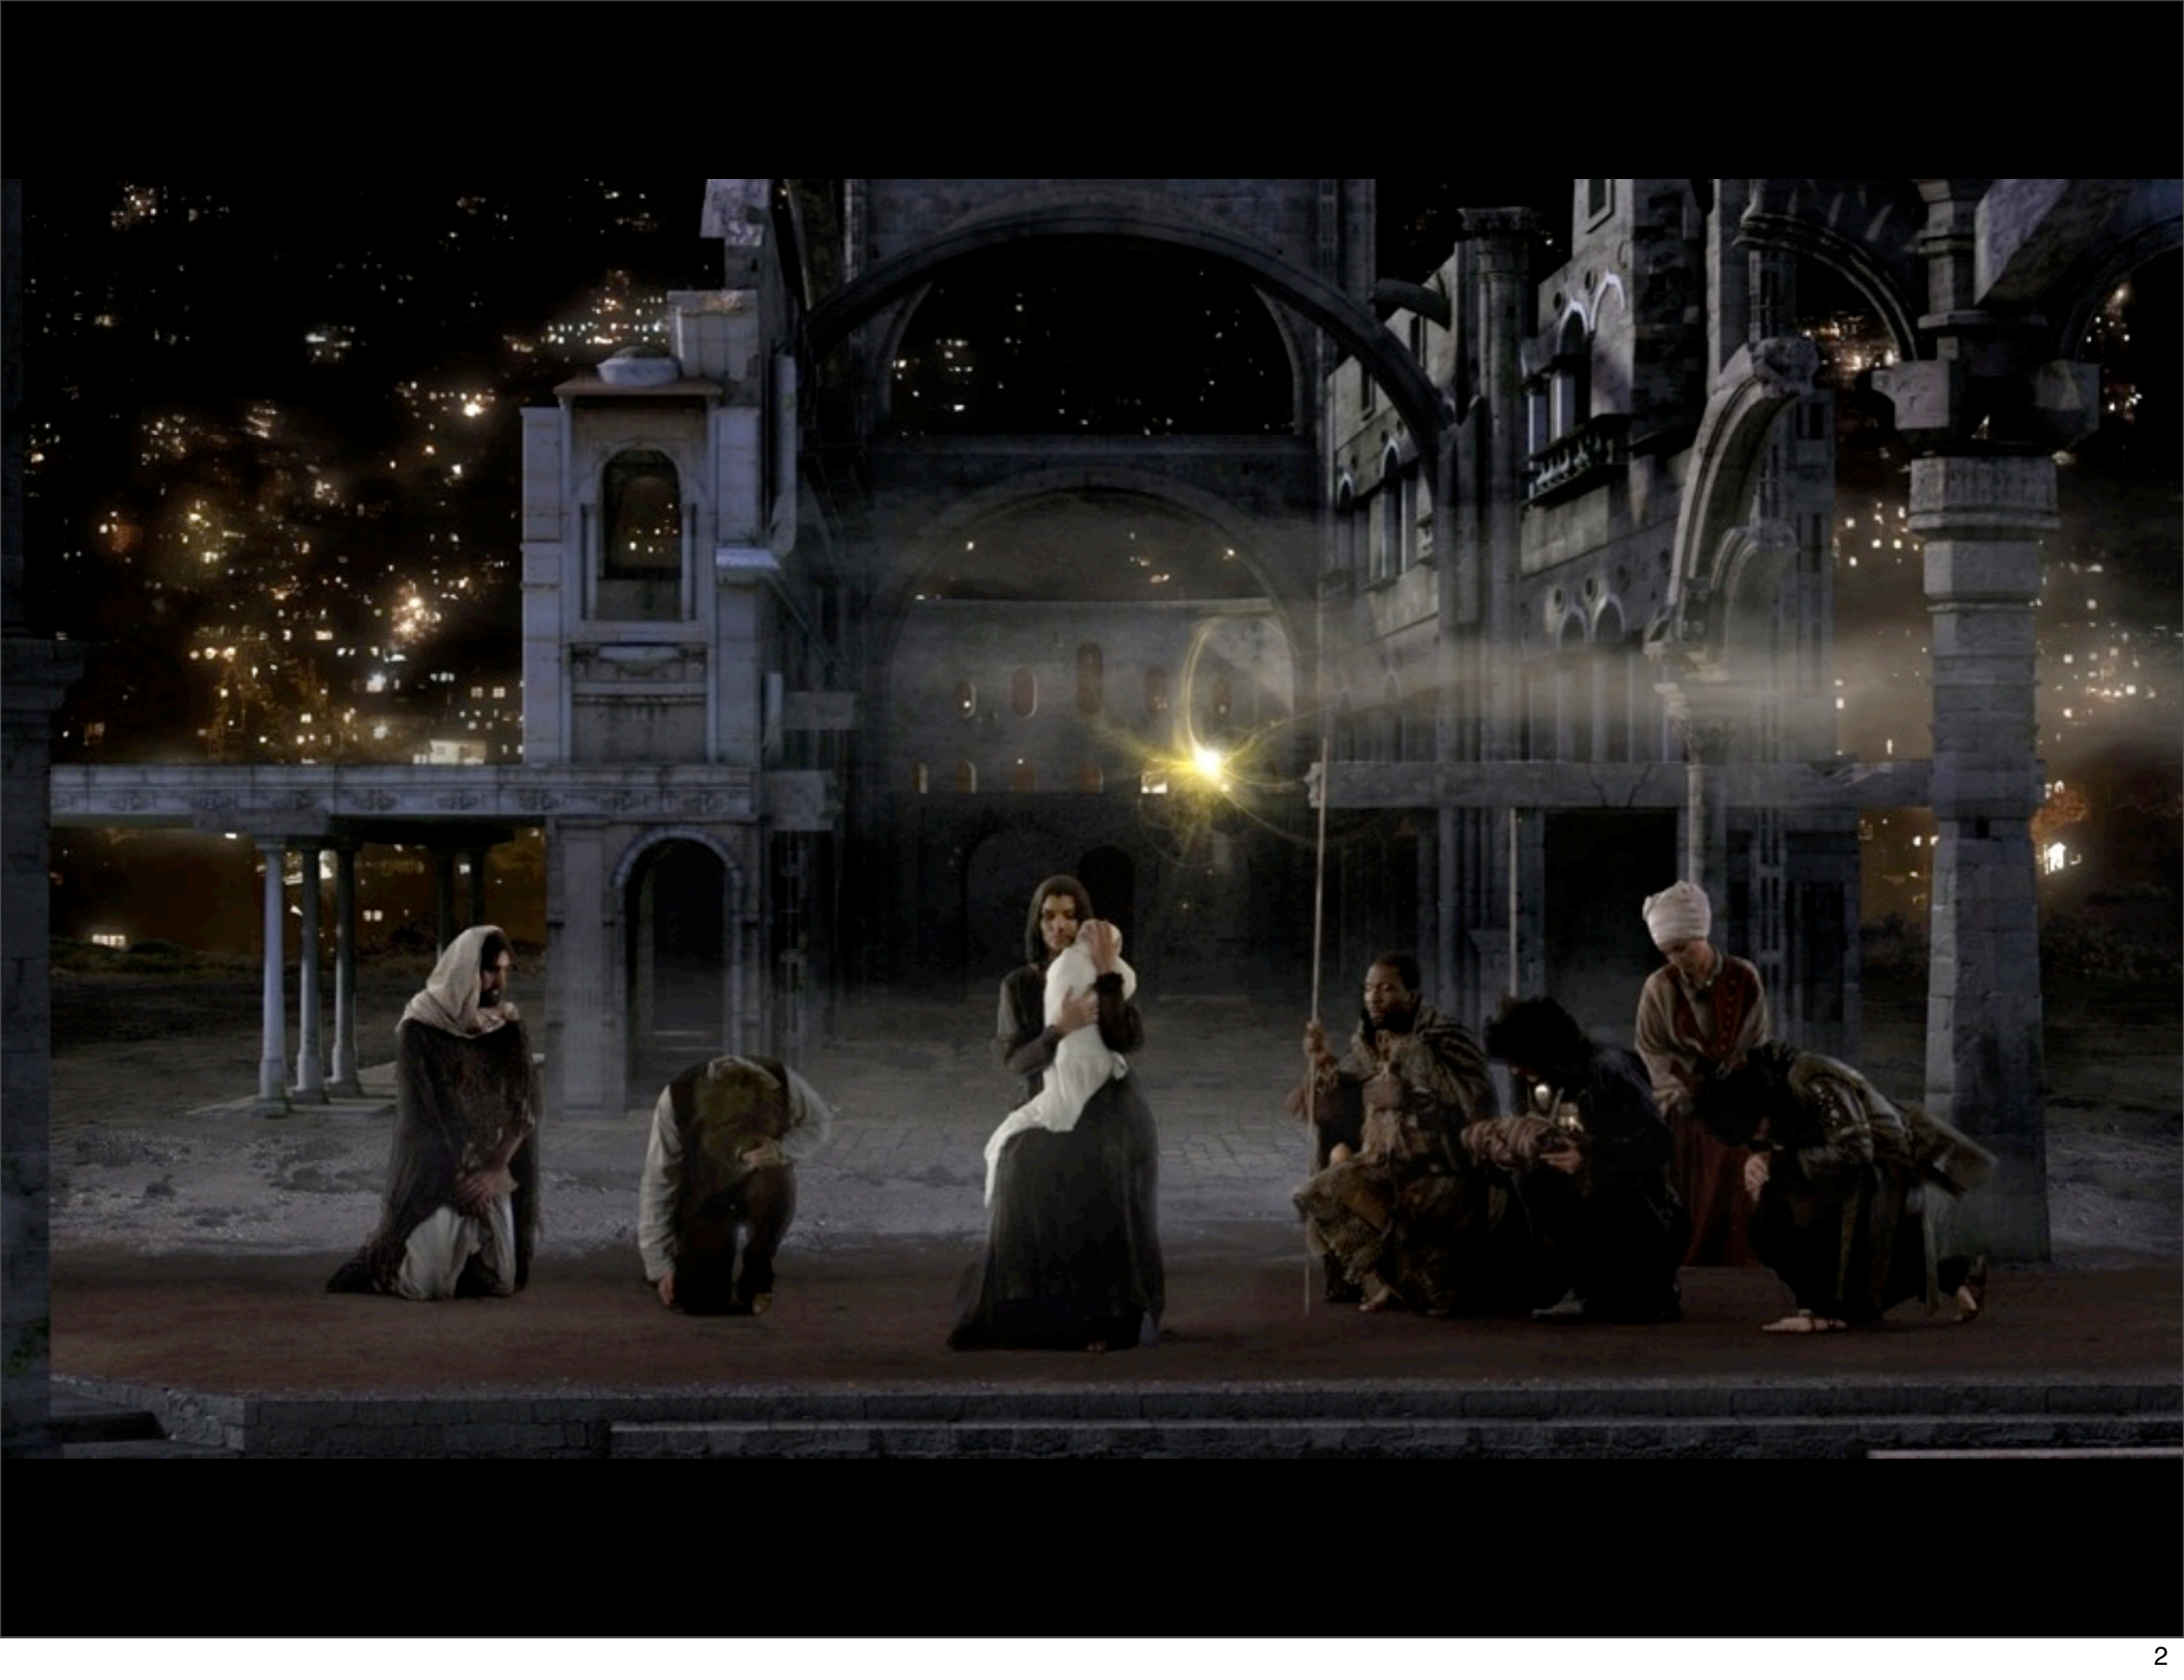

NATIVITY is a contemporary, moving image depiction of the Christ Nativity.

NATIVITY comprises an image which has the ability to change and to transform through many different states and for things to happen in the image - for people to arrive or the weather to change - that provoke a mesmeric and powerfully engaging fascination and impact.

Martha Fiennes has originated the pioneering system which enables the image to perform its own functions and effectively to 'come alive'. The process uses a highly innovative new media technology called SLOimage™. With the SLOimage™ system, all changes are random and unknown to both makers and viewers as the work is observed and while the image changes and unfolds continually, never reaching an end.

Please find still image samples below, depicting some of the many different 'states' that the NATIVITY manifests.
